

Burnham Football Club

Developing Sustainable Local Sports Facilities

Background

Burnham Football Club is one of the oldest clubs in Buckinghamshire, with a rich history and a loyal local fan base. In order to raise funds, the club sold land on the site of its ground to a residential developer, releasing capital to build a new stand and clubhouse.

Strategy and Implementation

The team worked closely with the club to secure appropriate funding and project manage the development.

The project helped the club to appoint a local construction company to build the new facilities which included a modern stand, taking the ground's capacity to 2000, a new car park, dressing rooms and four function rooms.

Outcome

Burnham FC is enjoying significant success and the new facilities continue to offer the club and the local community popular facilities. The new income stream produced by the conference centre has brought sustainability to the club, which is now a modern facility used by local businesses and the community.
